Semester 4

MPI 233: Dissertation I

The duration of thesis work is designed for one year which emphasize the student to carry out the development / research project in collaboration with a company or organization working in a technical business area or using a technology. In the thesis report it is important to show that it presents engineering research problem relevant work and results and that it requires application of both technical and interpersonal skills.

MPI 241: Dissertation II

This is the extension of Dissertation I which is designed further that the student is anchored in reality and can combine theory practice and methods in a results-oriented and holistic way and also can get things done within a limited time. This is a process of writing the thesis that integrates reading research writing and oral presentations
